PROFESSIONAL SUMMARY

Computer Science student at Cal Poly Pomona with a 3.7 GPA and hands-on experience in systems programming, embedded hardware, and networked application development. Proven ability to manage organizational responsibilities, communicate across teams, and deliver complete software projects end to end. Seeking software engineering opportunities where technical depth and professional reliability matter.

EDUCATION

California State Polytechnic University

Bachelor of Science in Computer Science. GPA: 3.7/4.0.

Pomona, CA

Expected 2027

Santa Monica College

Associate of Arts in General Science. High Honors.

Santa Monica, CA

2025

EXPERIENCE

Office Assistant

May 2026 – Present

University Village

Pomona, CA

- Serve as the primary point of contact for residents and visitors, providing customer service, answering questions, and directing requests to the appropriate departments.
- Maintain digital and physical records by creating, scanning, organizing, and updating confidential documents.
- Operate computers, printers, scanners, and administrative software to support daily office operations.

Student Assistant

Aug 2025 – Present

Patio by IBW

Pomona, CA

- Collaborate with a team of student assistants to streamline service flow and improve customer satisfaction.
- Prepare and assemble food items including sandwiches, pizzas, and beverages following portioning and food safety standards.
- Maintain cleanliness and sanitation of dining, kitchen, and dish areas in compliance with safety and health regulations.

Treasurer

Sep 2025 – Present

Software Engineering Association (SEA)

Pomona, CA

- Manage an approximately \$3,000 annual club budget, producing monthly financial reports and maintaining detailed records.
- Plan and coordinate workshops, hackathons, and networking events by managing budgets, securing supplies, and ensuring compliance with funding policies.
- Communicate budget updates and spending plans to club officers, ensuring clarity on cost allocations and purchase deadlines.

PROJECTS

Networked Tic-Tac-Toe

Apr 2026 – May 2026

C, Raylib, MQTT, ESP32, Git

- Built a fully functional two-player networked game in C as a solo project, integrating a Raylib graphical interface with real-time MQTT communication across two endpoints.
- Integrated an ESP32 microcontroller into the communication pipeline to exchange game events and synchronize moves between connected players via MQTT messages.
- Designed and unified the networking layer, GUI, and game logic into a single cohesive application, handling modular event processing and message parsing end to end.

Employee Search System

Feb 2026 – Mar 2026

C, Git

- Built a modular employee management application using structs, pointers, and reusable search functions to locate employee records.
- Implemented search methods using function pointers while organizing the codebase across separate source and header files.
- Applied modular software design principles to improve maintainability, readability, and scalability.

AWARDS & HONORS

- Dean's List, California State Polytechnic University Pomona
- Dean's List, Santa Monica College — 5 consecutive semesters

SKILLS

Programming Languages: C, C++, Python, Java

Tools: Git, Visual Studio Code, Xcode, Google Workspace, Microsoft Office

Operating Systems: Windows, macOS, Linux
